

## Goodbye for now...

Jenny Hunter, one of our Year 1 teachers, went on Maternity Leave this week.

We all wish her well and look forward to seeing Baby Hunter!!

## Personal Belongings

Cycles and scooter must be locked when left at the cycle stand and must not be left on the premises overnight.

Please label all children's clothing so that all lost items can be returned to the owner promptly

## Theme for March — Hope

## Craze of the Week

Traditional Games

## Parent and Carers Maths workshops

Welcome to a new season of workshops to help your child become a better Mathematician.

Each workshop will address a different aspect of our innovative approach to the subject: 'AIM' (see opposite). Speakers include Mr Rowbotham (Maths Specialist) Mrs Jones (Experienced KS1 maths teacher) and Mrs Wakefield (KS2 teacher).

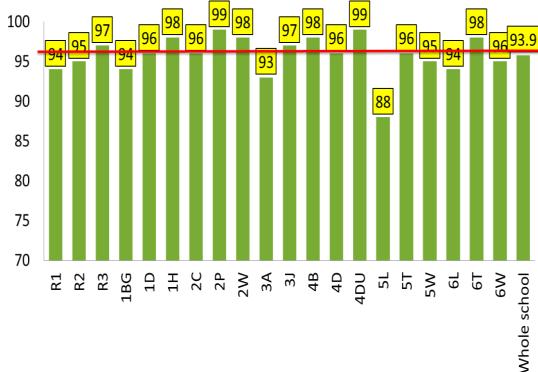

Workshops will be in the Main Hall, starting at 9.10 a.m. and should last no more than 40 minutes:

- Friday 3<sup>rd</sup> March:** Why it's important to have mental strategies for maths. Looking at arithmetic fluency, particularly with respect to developing number skills, number bonds and times tables.
- Thursday 16<sup>th</sup> March:** How to unpick tricky questions. Looking at approaches to tackling maths problems and developing investigative intuition.
- Friday 30<sup>th</sup> March:** Can you handle it? Understanding why using objects helps develop maths concepts. Mathematical mindfulness is explored as a way on engaging our children.

All workshops will have support materials for you to take away and will be very much 'hands on'.

Arithmetic Fluency  
Investigative Intuition  
Mathematical Mindfulness

### Congratulations
